SOUTHWARK COUNCIL, LEWISHAM

Striking fully glazed performance partitioning installed at Southwark Council

The refurbished offices of Southwark City Council located in Lewisham in London, feature Ocula™ FS25 partitioning.

Southwark Council required meeting room and private office division and opted for Ocula™ FS25 single glazed partitioning system. This striking project utilised a colourful range of full panelled manifestations and incorporated Ocula™ C-joint, single glazed frameless glass doors and drywall abutments.

Ocula™ FS25 is a fully glazed frameless partitioning system that combines highly desirable design aesthetics with outstanding fire and acoustic performance. Designed to offer specifiers the opportunity to create partitioning without vertical mullions to a maximum height of 4000mm, the system is available in Single, 58mm Twin Glazed and 105mm Twin Glazed options and offers seamless integration into drywall. Ocula™ FS25 can also be built to provide up to 25mm deflection as standard.
