

MEDICAL WASHROOM CUBICLE SYSTEMS

Part of **SIG**

MEDICAL WASHROOM CUBICLE SYSTEMS

Medical duct panels, sanitaryware, washrooms, reception desks and other furniture.

We offer furniture and sanitary solutions to suit any healthcare environment and have a detailed understanding of the building regulations and the complex requirements for these specialist clean environments.

All levels of durability are catered for to meet our customers specification requirements and commercial constraints, always combining innovation with practicality.

COMPLIANCE

The following are the main standards which set out the base requirements for the products supplied in this brochure to general Healthcare in both NHS and the private sectors.

HEALTHCARE TECHNICAL MOMORANDA

Replaced in 2013 by the HBN series of guidelines but are still referred to by many architects and practitioners.

- HTM 64
- HTM 68
- SHTM

HEALTH BUILDING NOTES

These are the latest documents and summarise and expand on the earlier HTM guidance.

- HBN 00-02 Sanitary spaces
- HBN 00-03 Clinical and support spaces
- HBN 00-10 Sanitary assemblies

The main purpose of HBN 00-02 and 00-03 is to ensure the design of any facility is correct. HBN 00-10 governs the majority of what is supplied and sets out the basis of materials.

In addition to the HBN guidelines, APPROVED DOCUMENT M BS 8300-1 and BS 8300-2 are also taken into consideration to ensure the design of any building is accessible and also that the correct number of items (e.g., toilets) are provided.

We operate a policy of continual development. The company reserves the right to change specification and design at any time without notice.

LINDO CLINICAL WASH HAND BASIN

Clinical Wash Hand Basin IPS Units

Lindo is a metal framed, factory assembled Compact Laminate panel set with lift/pull off access panels. Its seamless corners and tight fitted panels are easy to clean and impervious to spills. Manufactured in the UK, it is delivered as a complete unit with panels, sanitary and brassware attached so that the unit is quickly installed. Return ends are supplied where required to achieve a box-out unit. It can be specified in Polyrey® anti-bacterial laminate and manufactured in bespoke sizes.

Features

Frame type: Metal framed

Access panel: Lift off/pull off

Surface finish: Polyrey® Compact Grade Laminate

Hygiene: Sanitised Actifresh®

Corner detail: Seamless postformed corner boxing

Typical sizes heights: 1500mm - 2800mm

Typical sizes widths: 600mm – 900mm

Standard depths*: 100mm – 300mm

Compliance: To HBN00-10 Part C

*Subject to configuration and width – average sizes stated

SANITO CLINICAL WASH HAND BASIN

Clinical Wash Hand Basin IPS Units

Sanito is a metal framed, factory assembled Compact Laminate panel set with a unique recessed pivot hinge and lockable access panels. Its seamless corners and tight fitted panels are easy to clean and impervious to spills. Manufactured in the UK, it is delivered as a complete unit with panels, sanitary and brassware attached so that the unit is quickly installed. Return ends are supplied where required to achieve a box-out unit. It can be specified in Polyrey® anti-bacterial laminate and manufactured in bespoke sizes.

Features

Compliance: To HBN00-10 Part C

*Subject to configuration and width – average sizes stated

TECTO CLINICAL WASH HAND BASIN

Clinical Wash Hand Basin IPS Units

Tecto is a frameless one piece unit with minimal edges. Formed from hygienic cladding over a plywood core with seamless corners and recessed doors, this unit has fewer recesses and reduces the risk of bacterial growth. The lockable access panels ensure maintenance is simple, while the unbroken section between houses the sanitary and brassware ensuring no water ingress. Manufactured in the UK, it is delivered as a complete unit with sanitary and brassware attached so that the unit is quickly installed. It can be specified in a wide range of colours and manufactured in bespoke sizes.

Features

Frame type: Frameless

Access panel: Hinged doors

Surface finish: Semi-rigid PVCu sheet

Floor box: Plywood plinth for floor covering detail

Corner detail: Seamless wrapped corner

Typical sizes heights: 1500mm - 3000mm*

Typical sizes widths: 600mm – 900mm

Standard depths: 100mm – 300mm**

Compliance: To HBN00-10 Part C

*Plus floor box

**Subject to configuration and width – average sizes stated

PURITO CLINICAL WASH HAND BASIN

Clinical Wash Hand Basin IPS Units

Purito is a frameless one piece unit with minimal edges. Formed with seamless corners and flush recessed doors, this unit has fewer joints and reduces the risk of bacterial growth. The lockable flush access panels ensure maintenance is simple, while the unbroken section between houses the sanitary and brassware ensuring no water ingress. Manufactured in the UK, it is delivered as a complete unit with sanitary and brassware attached so that the unit is quickly installed. The unique recycled panel material is hygienic, impervious to water, and resistant to bacteria due to the Biomaster® antimicrobial technology proven to reduce the growth of harmful bacteria.

Features

Frame type: Frameless

Access panel: Flushed hinged doors

Surface finish: Sealwise

Hygiene: Biomaster®

Corner detail: Seamless profiled corner

Typical sizes heights: 1500mm - 2400mm*

Typical sizes widths: 600mm – 900mm

Standard depths: 100mm – 300mm**

Compliance: To HBN00-10 Part C

*Plus floor box

**Subject to configuration and width – average sizes stated

DISPOSAL IPS UNITS

Compact stainless steel disposal units

A range of three stainless disposal units to allow for the instant and convenient disposal of organic waste. Each system is designed with a sanitary working area and lever action taps to avoid cross-contamination across healthcare applications. Designed to withstand the demands of busy hospital and medical areas, the disposal units are compatible with Lindo and Sanito, and also Higeno and Purito with a seam.

SURGICAL SCRUB-UP TROUGHS: IPS UNITS

Stainless steel

Intended for use in the healthcare sector, surgical scrub-up troughs are used for surgical washing of hands and forearms in hospitals, clinics and operating theatres. Available in three sizes, each scrub-up trough is made using stainless steel. Compatible with Lindo and Sanito, and Higeno and Purito with a seam, and also available with a range of clinical taps.

JANITORIAL: IPS UNITS

Intelligent space-saving benefits for cleaning and storage

Designed for cleaning and storage, the janitorial units offer intelligent space-saving benefits. These compact stainless steel units are compatible with Lindo, Sanito, Higeno, Tecto and Purito. Also available with bespoke storage as shown.

S0711 Janitorial unit

PLASTER SINK: IPS UNITS

Includes lift-out strainer basket

A plaster sink with a lift-out strainer basket. Compatible with Lindo and Sanito, and also Higeno and Purito with a seam.

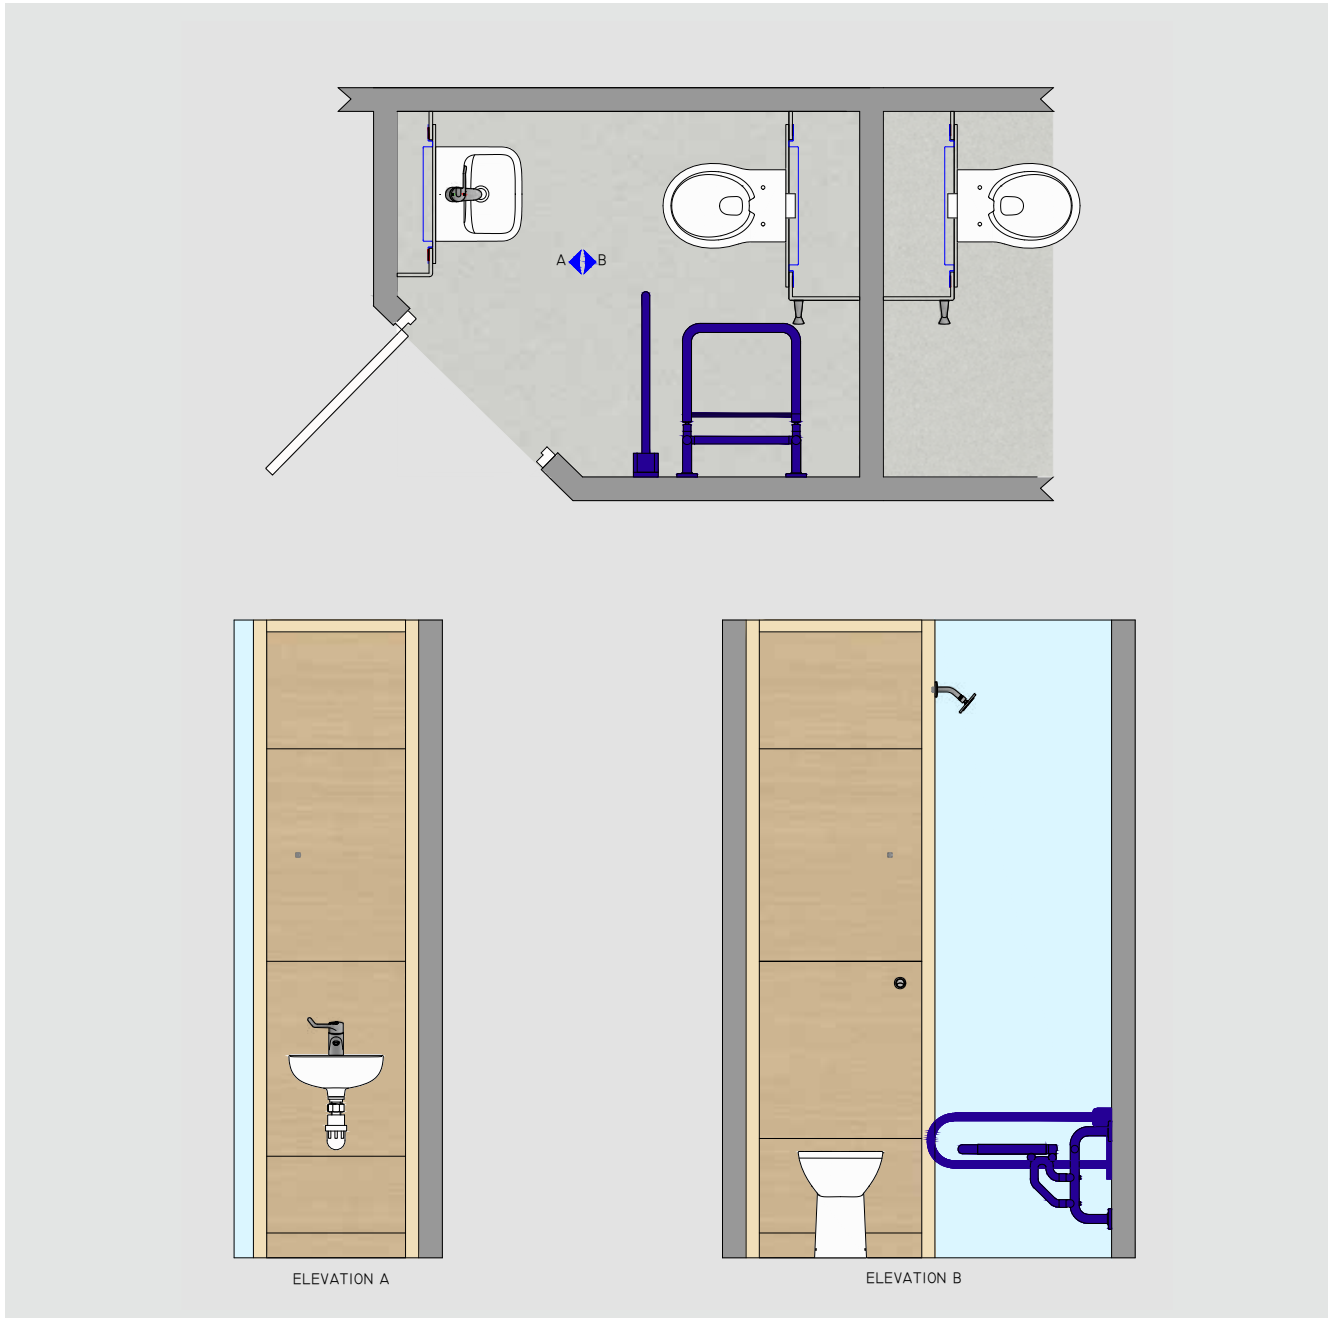

S6558/S6557 Clyde plaster sink left/right hand with S8270 Markwik ½" bib taps

ENSUITE

Safety, usability and accessibility

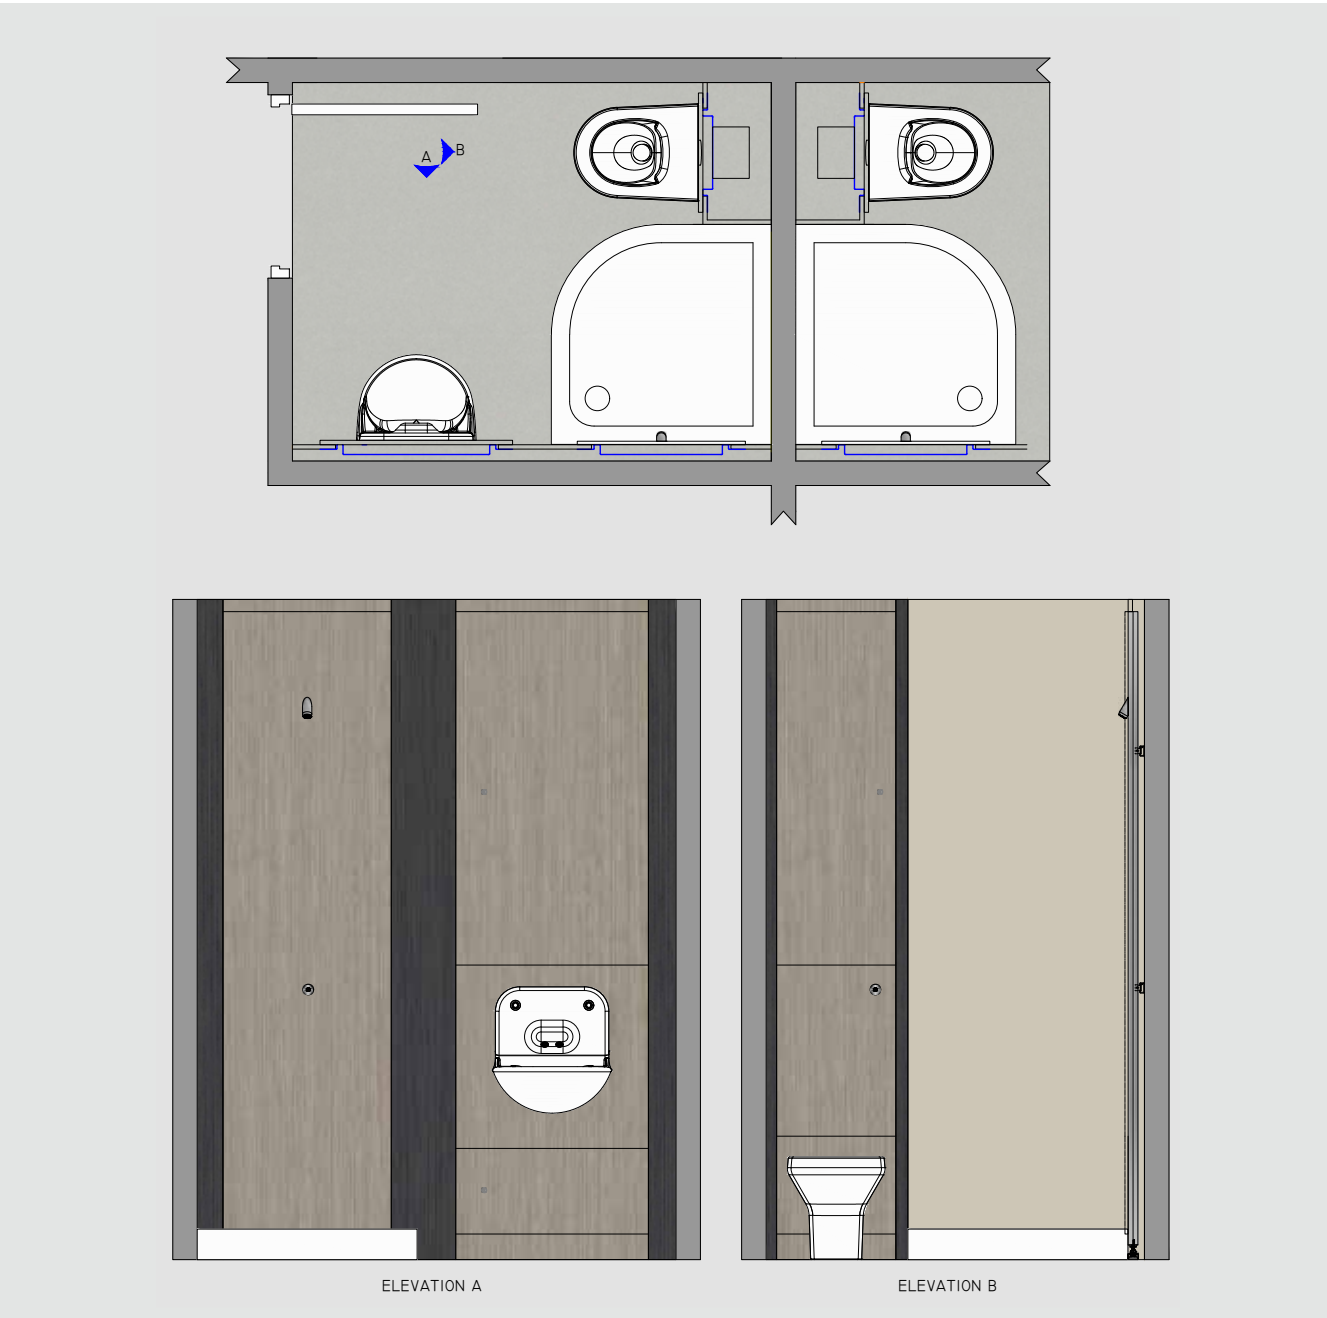

Ensuites designed for the usability and accessibility of both patients and nurses. These rooms can be specified with a range of WCs, basins, taps and thermostatic shower units to provide comfort to the user.

SAFE ENSUITE

Providing patient protection

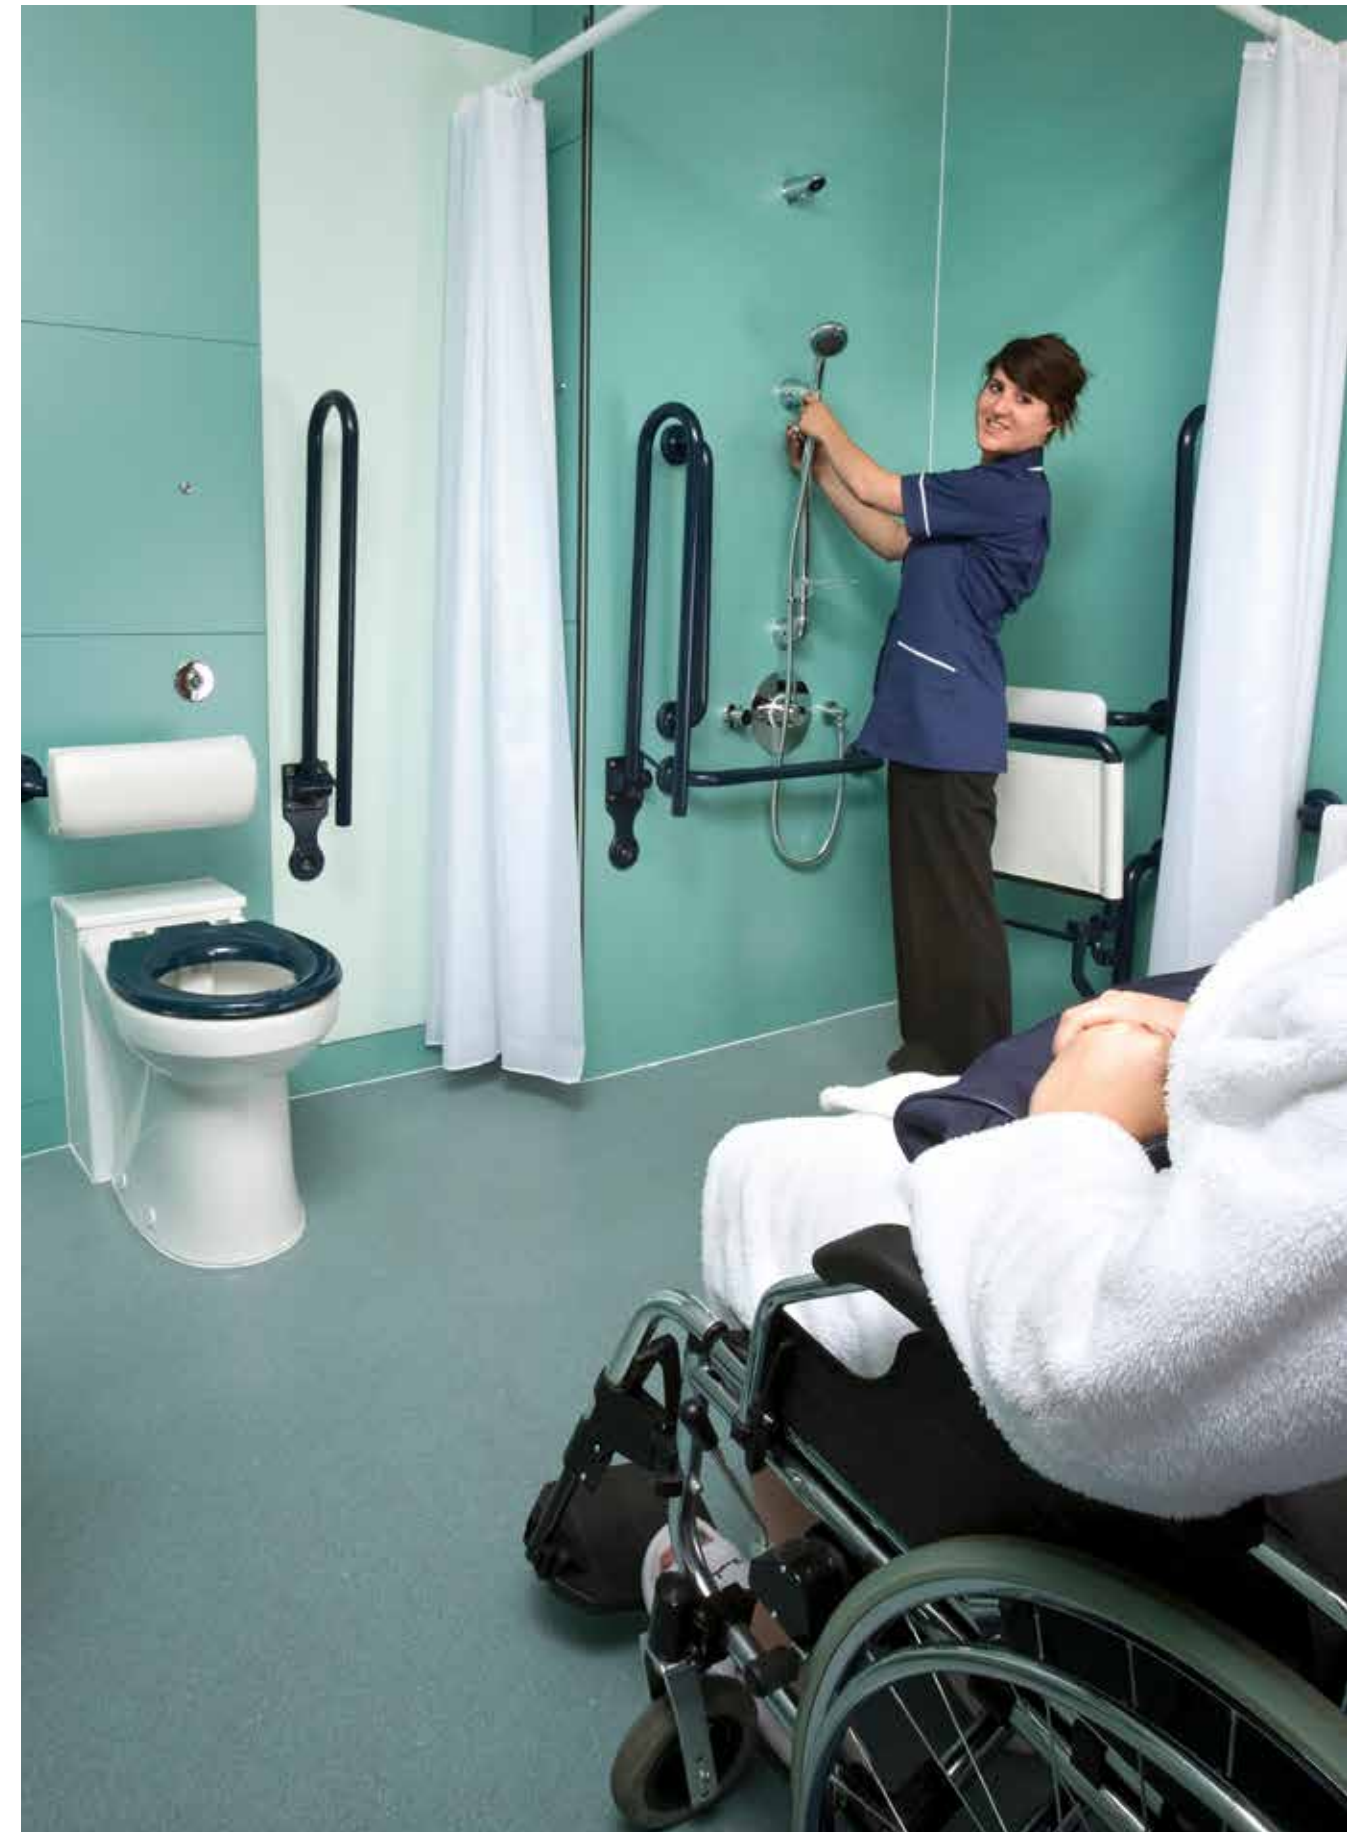

Safe ensuites are used in mental health hospitals to provide patient protection. The ensuites include high-security showers, concealed and smooth-edged products and both standard and disabled components. Available with a range of high performing and hygienic non-porous surface materials. The range of ligature resistant safe ensuite WCs and basins are manufactured from GRP material and compatible with duct systems.

PATIENT ASSISTED BATHROOM & TOILET

Easy to use assisted toilets and bathrooms

Well-designed assisted toilets and bathrooms are integral to patient comfort. An array of sanitaryware products are available to create easy to use assisted toilets and bathrooms, including accessible hand wash basins, showers and baths, WC units and taps. Designed specifically for healthcare and medical facilities, the range of product options allow for design flexibility.

NOKK NURSE STATIONS

Non-standard and bespoke options available

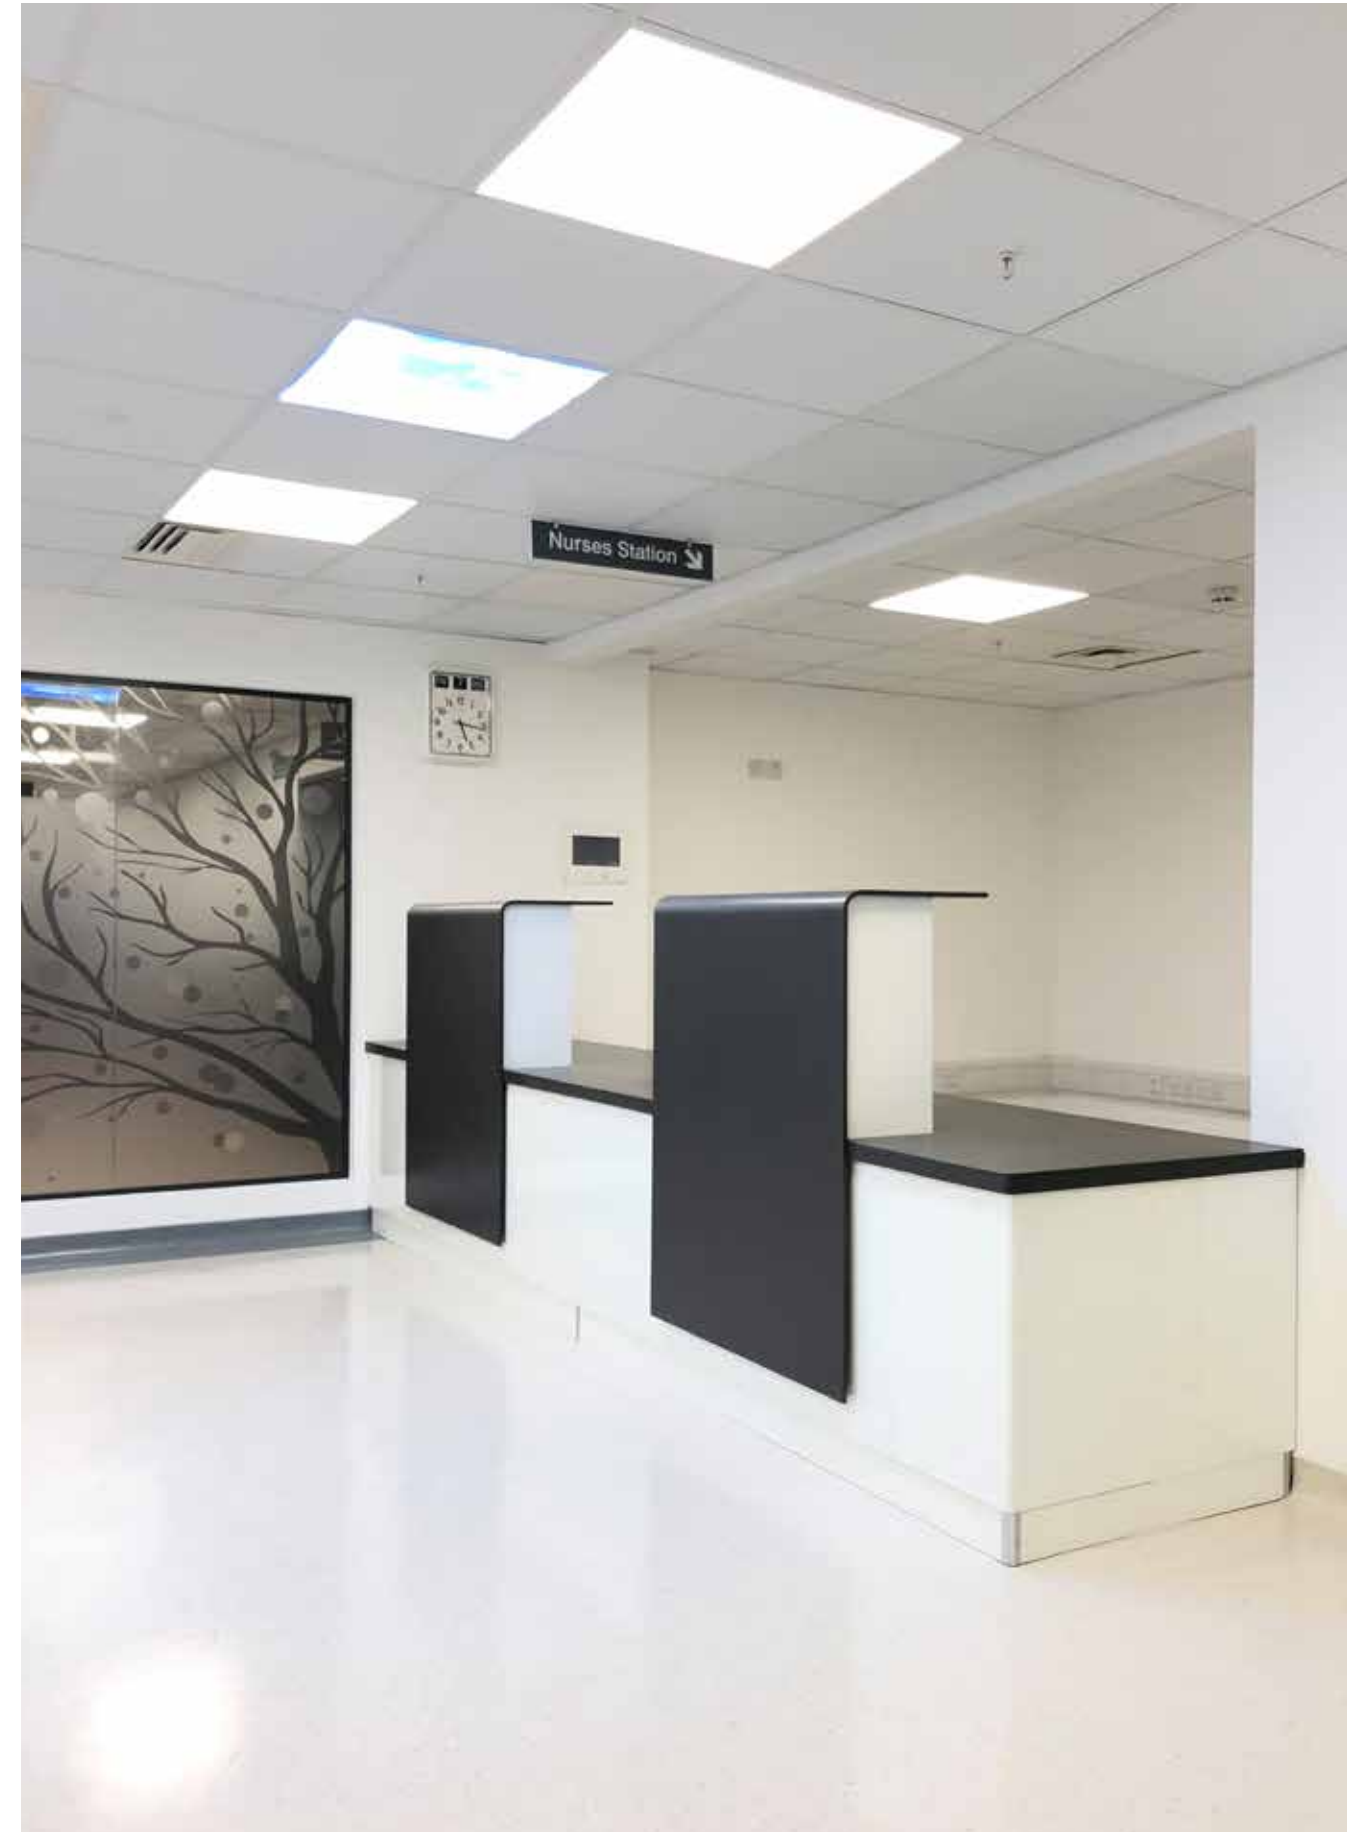

A well-equipped and designed nurse station is essential to both the organisation of the patient care and the efficiency of the facility's operations. Depending on user requirements, size restrictions and aesthetics, options are available for non-standard and bespoke nurse stations.

NOKK RECEPTION DESKS

Unique with limitless options

Reception desks act as the first point of contact with patients and visitors in any healthcare and medical facility. Forming the first impression, the design of reception desks contribute to creating a soothing and professional atmosphere. The reception desks are designed and crafted to be unique. With many options available, designers and specifiers can create reception desks to suit specification requirement.

NOKK FURNITURE

Optimise storage space while being adaptable

Where space is limited, furniture in healthcare and medical facilities need to be extensively considered. Fitted furniture and free-standing units can optimise storage space for medical equipment and importantly allow adaptability and user flexibility. Offering bespoke products to suit every surrounding and inspiring designs that are functional and visually appealing. Various furniture products are available, from high-end concealed cabinets to food and drink units. NOKK furniture can also be made to complement public and staff areas, from restaurant condiment stations to rest area tea stations.

PURITO FURNITURE

Antibacterial, durable and easy to clean

Purito furniture is designed and manufactured from Sealwise® board. This closed cell UPVC/PVC sandwiched board with antibacterial Biomaster® technology built-in guarantees long-lasting barrier protection against bacteria growth. While similar in weight and density to MDF, it offers 2.5x better screw retention than MDF, and being 100% waterproof offers zero swelling. Purito is highly durable, easy to clean, chemically resistant, antistatic and Formaldehyde free. These features make Purito furniture the ideal unit to replace Chipboard based furniture in hospital environments.

A wide range of storage solutions are available to suit HTM 63 and HTM 71 requirements in both Purito Modulus and Staticus ranges. Options include general storage for utility rooms, mobile cupboards, bedside lockers and wardrobes. The units are white, but bespoke printed facias are available on request. Both ranges are available with two handle colours, three contrasting lipping colours.

Features

Locks: Units can be supplied with budget locks on request

Lipping: Blue, grey and woodgrain

Handles: Aluminium or blue powder coated

Purito Staticus

A built-in unit with surface mounted doors, available in various configurations, including drawer, door, and storage options.

Purito Modulus

Can be used as a freestanding unit with flush doors, available in various configurations, including drawer, door, and storage options.

WORK SURFACES

A surface type to suit your needs

A wide range of surface types are available which are commonly used in many hospital applications, ranging from laboratory grade compact laminates, cabinet worktops, shelves and counters.

High-Pressure Laminates

Desktops, worktops and counter tops are manufactured using either compact grade or HGP and VGP laminated bonded board which are impact resistant and easy to keep clean. Available in many colours and wood effects, these can be straight, angled and curved to suit your needs. The standard range of Polyrey® laminates are ANTIBACTERIAL SANITIZED® GRADE which eliminates 99.9% of bacteria.

Solid Surfacing

The acrylic solid surfaces are manufactured with smooth edges and can be joined seamlessly to create a large single surface. Easy to clean and maintain, and resistant to bacteria solid surface materials are ideal for laboratory work tops, countertops, sinks, nurses' stations and much more. Available in a wide range of colours with a very smooth finish.

Purito

The Purito worktop with its unique solid plastic nature has been designed to match the Purito furniture. Purito not only provides durability it also has Biomaster® Antimicrobial protection giving excellent antibacterial properties.

HYGIENE SCREENS

Help keep employees, patients and visitors safe

Hygiene screens help reduce the transmission of harmful bacteria or viruses between employees while also providing patients and visitors with the confidence that health and safety have been prioritised in their surroundings. Completely bespoke, flexible, and moveable, hygiene screen options are available that can be used in various materials and applications. From a simple brief, complex and detailed designs can be brought to life.

SIGNS

Clear and directional

Signage options are available which can be used across healthcare facilities, from hallways to hospital beds. Signs are essential to ensure that no tasks are interrupted, that patient care is well considered and that healthcare facilities are clear and directional.

PUBLIC WASHROOMS

Hardwearing resistant and durable systems

Complete washrooms to suit any unique project requirement are available. Considering the design, budget and functionality, various product options are available to create bespoke washroom solutions and offer an all-in-one commercial washroom service, from initial designs to the finishing touches following installation.

WALL CLADDING

Easy clean and waterproof

A range of wall coverings are available ideally suited to the hospital environment. They are easy clean, waterproof, robust and come in a wide range of colours and finishes.

Altro Whiterock®

A proven, high performance, hygienic wall covering, Whiterock is available in a wide range of colours and wood effects. The finish is impermeable and can be installed seamlessly around corners. Sheets can be welded together to form a continuous wall covering.

Laminate

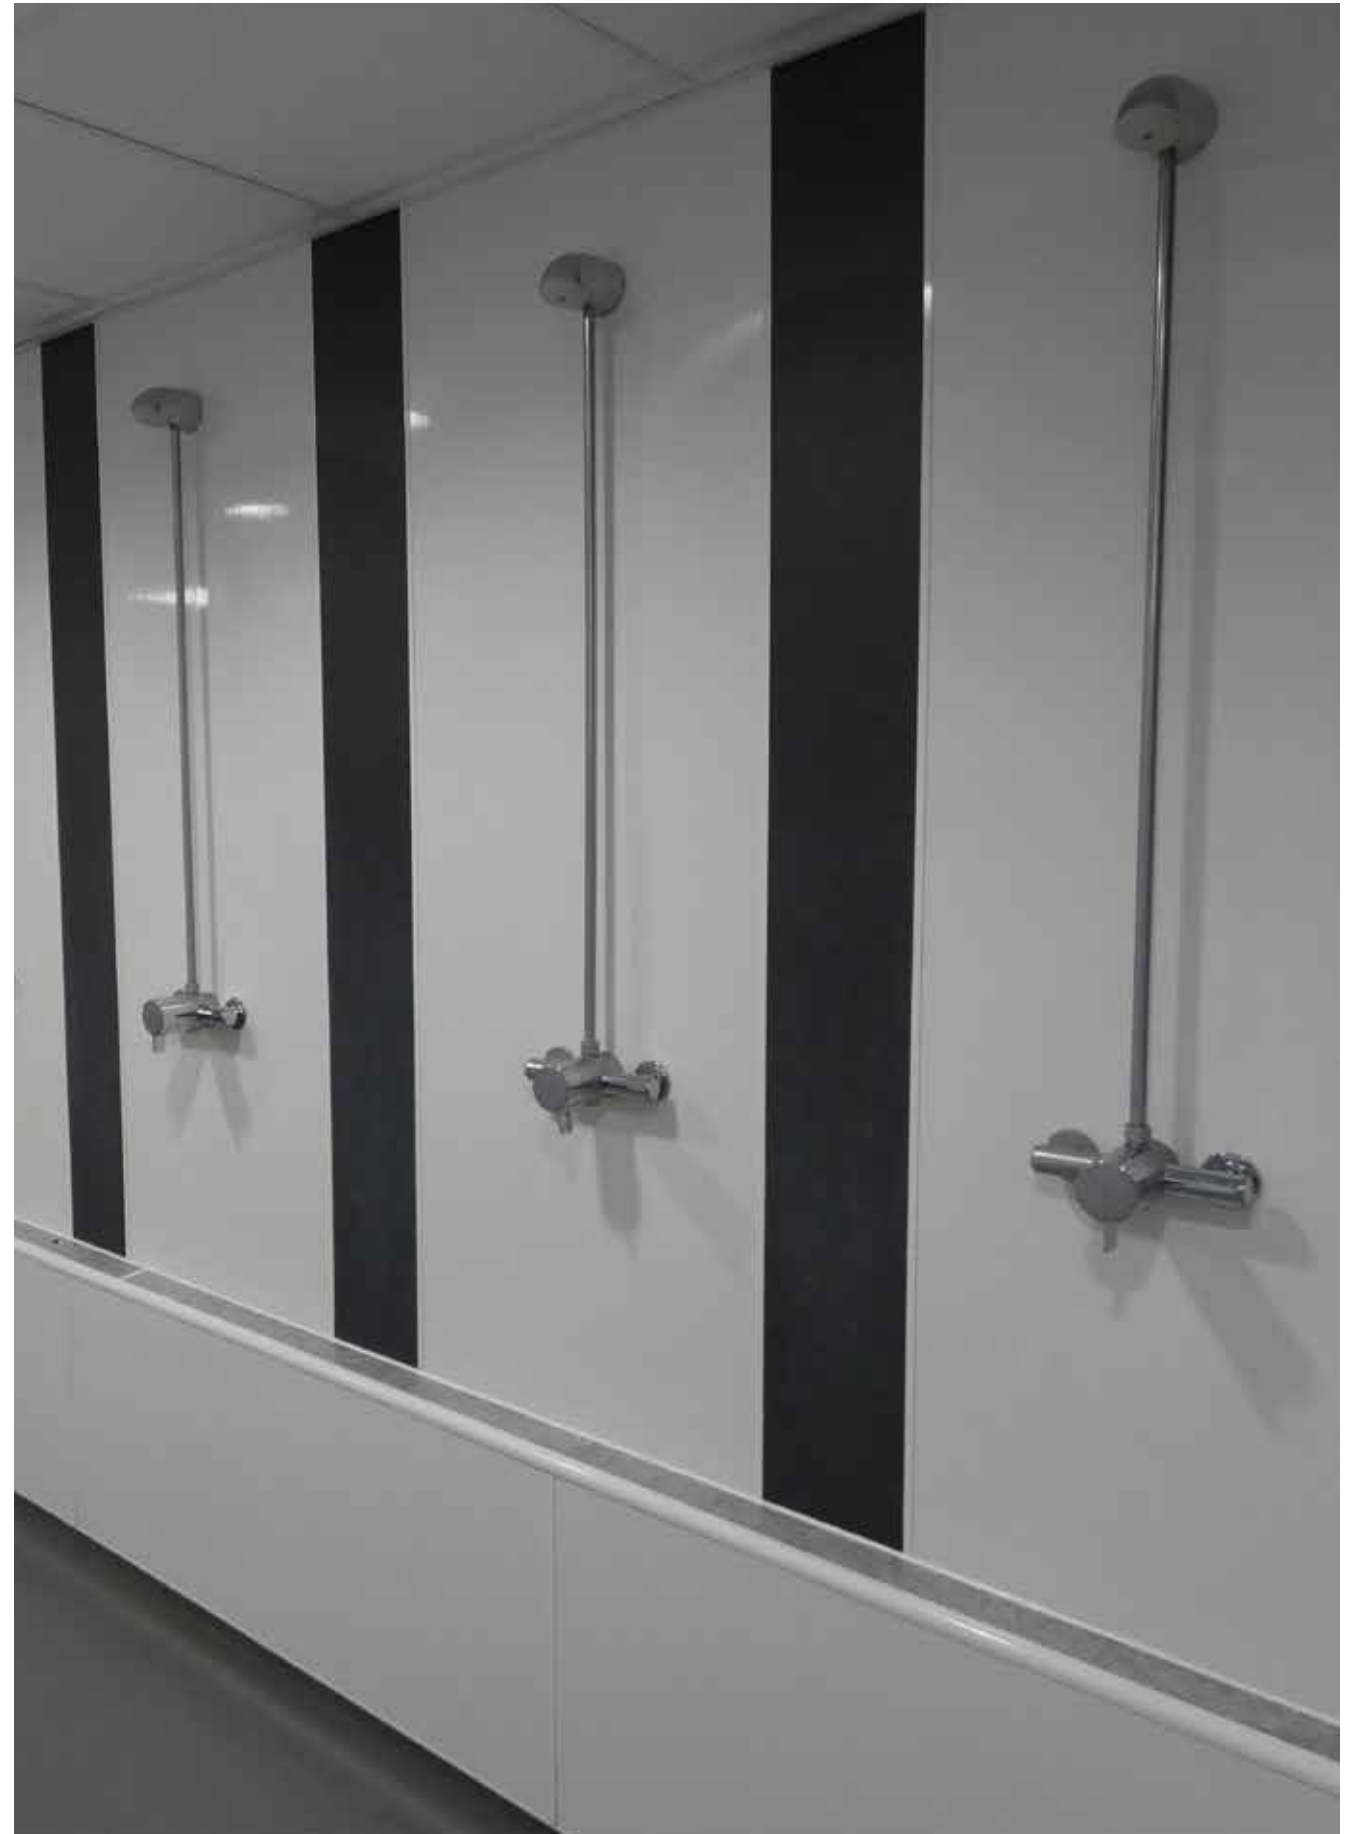

Available in either Compact Laminate or a High Pressure Laminate bonded board and creates a decorative, impermeable and easy clean wall covering. Installed in continuous panels or with jointing strips, this system is quickly installed and supplied in a full range of colours and wood effects.

Fibo®

Fibo® panels come in full lengths and click together in order to give either a smooth finish or a simulated tiled effect, without the need for grout. Available with corner trims to ensure a waterproof finish when installed. Simple to clean and available in a number of colours and finishes to suit a wide range of requirements.

Custom Printed

A custom print option can be supplied utilising UV cured inks onto an Altro Whiterock® sheet. This can be to any design or even a photographic image and makes for striking feature walls all while retaining the full benefits of the Altro sheet.

STAFF CHANGING ROOMS

High-durability solutions

Bespoke premium changing rooms are available specifically suited to your requirements, from simple toilets and changing rooms with lockers to showers and cubicles. Delivering high-durability solutions, including moisture and vandal-resistant cubicles with anti-bacterial properties.
